Compliance Built In

ASIC · NCCP · ACL · AUSTRAC · AWS Infrastructure

Built for your Stage

Better than a spreadsheet, without the enterprise weight

Growing lenders run on patchwork for schedules, approvals, credit checks, ID, payments and comms. Min-It pulls the whole operation into one place.

Persona A

H1

For Small Lenders & Credit Reps

H2

You're running the whole operation yourself.

H3

- NCCP and responsible lending obligations built into the workflow
- Hands-on support from people who know the platform
- No complex setup
- No enterprise pricing

Persona B

H1

For Growing Lenders

H2

You've outgrown your current system.

H3

- Origination, servicing, payments and member portals in one place
- Audit trail and reporting your funder or investor actually wants to see
- Configurable to your loan products
- Migration handled end to end

Persona C

H1

For Established Lenders

H2

Your volume needs a platform with compliance built in.

H3

- Local data residency on AWS Infrastructure
- Built to handle SACC, MACC, consumer credit, business lending and more
- Complete audit trail across the loan lifecycle, from origination to final repayment
- SOC 2 and ISO27001 pending

One platform for full lending lifecycle (or One Platform. Application to Final Repayment.)

H1

From the moment someone applies for a loan till their final repayment clears, we handle every step through a single connected system.

Product 1

- H2
Min-It CRM
- H3
Loan origination, client management and compliance tooling built for lenders. NCCP obligations handled at every step.
- H4
Application workflow, Credit decisioning, Digital contracts, E-signing, Multi-channel comms

Product 2

- H2
Min-It Pay
- H3
Instalments, disbursements, reconciliation and payout tracking - all connected to leading national payment rails.
- H4
Direct debit, NPP, PayID, Disbursements, Reconciliation, Payout tracking

Product 3

- H2
Min-It LMS
- H3
The servicing engine at the centre of your loan book. Manages the full loan lifecycle so your team isn't manually tracking what should be automated.
- H4
Repayment scheduling, Arrears management, Dishonour handling, Portfolio reporting, Real-time notifications

Product 4

- H2
Member Portal
- H3
A self-service portal your borrowers can use to access account visibility, repayment history and document access. Without your team fielding calls for information the system already holds.
- H4
Borrower self-service, Account management, Document access, Real-time notifications

Application to active repayment, All-in-One system

Lending Models Supported

For SACC & MACC Lenders

H2:

Purpose-built for short-term and small-amount credit. Protected Earnings Amount checks, responsible-lending obligations and hardship workflows are handled in the flow.

- PEA assessment enforced at approval
- SACC and MACC product structures out of the box
- NCCP-compliant hardship and default workflows

For Consumer Lenders

H2:

Personal loans, secured and unsecured, coded and non-coded - originated, decided and serviced in one connected system.

- Open-banking serviceability and affordability scoring
- Digital contracts and e-signing in seconds
- Full lifecycle from application to final repayment

For Vehicle & Asset Finance

H2:

Secured lending with security lifecycle managed end to end, right from origination, valuation and PPSR handled inside the platform.

- Security capture for vehicles and personal property
- PPSR registration, search and discharge by direct integration
- Split disbursements to multiple payees

For Business & Commercial Lenders

H2:

Commercial and business lending with audit trail and reporting your investor actually wants to see.

- Configurable to your commercial products
- Investor, warehouse and securitisation reporting
- 60+ NCCP / ASIC-compliant reports, exportable on demand

For Non-bank & Specialist Lenders

H2:

Enterprise-grade origination, servicing, payments and compliance, without the enterprise price tag.

- Australian data residency (Azure AU region)
- AUSTRAC-aligned KYC, PEP and sanctions screening
- Live in 7-10 working days

For Credit Representatives & Owner-operators

You're running the operations yourself. Min-IT handles compliance so you don't need a compliance team to stay on the right side of ASIC.

- NCCP obligations built into the workflow
- No complex setup, no enterprise pricing
- Hands-on support from people who know the platform

Loan types we handle

SACC · MACC · Consumer unsecured · Consumer secured · Vehicle & asset finance ·
Business & commercial lending · Lines of credit · Fixed, variable and interest-only structures

About Us

About Min-IT

H1:

Seriously Compliant Lending Software.

H2:

Since 2006, we've been building origination, servicing and payment software for Australian non-bank lenders, with the compliance obligations built in and without the enterprise price tag.

Primary CTA: Book a Demo

Secondary CTA: Talk to our Team

Our Story

H1:

Building lending software with Australian lenders since 2006.

Min-IT was founded in 2006 to solve a problem that hasn't really gone away: Australian non-banking lenders were choosing between enterprise platforms priced for banks and systems held together with spreadsheets.

We took the middle path. Software with the capability serious lenders need - full lifecycle origination and servicing, payments, borrower portals, compliance workflows, priced and implemented for businesses that don't have a hefty budget or a two-year runway.

150+ Australian lenders run on Min-IT today.

Floating windows

4.4M+ (Applications Processed) · 20+ years (In the Market) · AUD 12B+ (Processed) ·

OUR STORY

We know this industry because we've lived in it

EasyLodge® was established in Newcastle, Australia in January 2007 with one mission: to give small and medium-sized lenders access to the same quality of credit technology used by the major banks — without the \$100,000 scoping studies, multi-year implementation projects or eye-watering licence fees.

Our founding roots reach back further. Kosta Patsan, our founder, established Finance Now and Surety long before EasyLodge was launched — with Surety going on to become Australia's seventh largest personal loan lender. That foundation of deep, hands-on lending experience — not software theory — is what shaped EasyLodge into what it is today.

We have been building, improving and supporting the platform ever since — investing over \$1.46 million in R&D in FY2025 alone, all at no additional cost to our clients. We build solely for the credit industry and maintain our competitive advantage by thinking like lenders, not like traditional software vendors.

"When you're working with EasyLodge®, you're dealing with me — the founder. I've built a great team of 23+ people that support our clients unconditionally."

— Kosta Patsan, Founder & Managing Director

At no additional cost to our clients

Company History

H1:

20 years of Australian lending

2006: Min-It founded

Min-It is established to build lending software for Australian non-bank lenders. Purpose-built for the way credit providers actually operate.

Min-It LMS

Live ledger, repayment scheduling, arrears and portfolio reporting in one place, across coded and non-coded consumer products.

Min-It CRM

Origination joins servicing on one database. Lenders could take an application, assess it, fund it and service it without re-keying a single field.

Min-It Pay and Member Portal

Payment services and borrower self-service arrive, closing the two remaining gaps: money in and out of the ledger, and borrowers answering their own questions.

Now: AUD 12B+ processed, 4.4M loans serviced

150+ lenders across four countries, still improving the platform off the back of what our clients run into. New lenders live in 7-10 working days.

Founder's Voice

Harinath Gorthy

H1:

Co-Founder

LinkedIn

H2:

"Twenty-plus years of doing this, and I've noticed the security question and the compliance question are really the same question, just asked by two different people. One wants to know where the data lives and who can see it. The other wants proof of it during an audit. The answer is the same for both of them.

Data sits in the Australian region on Azure, sandbox kept separate from production. Every applicant goes through AUSTRAC-aligned KYC, PEP and sanctions screening before we get anywhere near approving them, and the data itself is handled under the Privacy Act and the Credit Reporting Privacy Code. An investor reviewing one of our clients checks for exactly that, so it was never something we could treat as a nice-to-have. SOC 2 and ISO 27001 are also in-progress."

Vidya Jatheesh

H1:

Co-Founder

LinkedIn

H2:

"Most lending platforms get built once and then left for the lender to work around. I hear a version of this in nearly every early conversation with my clients. The software handles origination and servicing well on paper, but it doesn't align with how they actually run their book. So a spreadsheet quietly picks up the slack.

With my background in system architecture, we build compliant workflows that are built in, so you don't keep patching it in later. Every module of Min-IT's platform gets shaped around what a real loan book needs. When a client tells us a product structure doesn't work for them, we put it on the roadmap built around their specific use case."

Products

Platform & infrastructure

H1:

Option 1: Compliance first lending infrastructure hosted in Australia

Option 2: Australia-based lending infrastructure with compliance built-in

H2:

Min-IT runs on Microsoft Azure in Australia for both the environments - Sandbox and Production. Keeping your borrower and credit data onshore.

Purpose-built for lending since 2006.

Primary CTA: Book a Demo

Secondary CTA: Talk to Our Team

Min-IT Lending Platform

H1:

One connected system to run your complete loan book - Origination, Payments, Servicing and Borrower Self-Service.

H2:

SACC: Small amount credit contracts of up to AUD 2,000

MACC: Medium amount credit contracts between \$2,001 and \$5,000

Consumer credit: Regulated personal lending under the National Credit Code (NCC)

Continuing credit: Open-ended facilities dependent on borrower withdrawal and repayment

Vehicle: Secured motor vehicle finance

Line of credit: An approved limit the borrower draws against and repays as they need it

Principal-only: Loans structured so repayments reduce the principal without interest accruing

Business: Commercial lending that generally sits outside the National Credit Code (NCC)

Coded & non-coded: Both run side by side in one loan book with the right obligations attached to each.

Modules

Min-It CRM

Loan origination, client management & compliance

From first enquiry to signing a contract. Get lead capture, pre-screening, open banking, identity verification and KYC, credit rules and contract generation in one workflow.

- Open branded broker, introducer and direct application channels
- Get open banking and credit data through TaleFin, CreditSense and Equifax

- Run identity, PEP and AUSTRAC-aligned screening through GBG greenID and Equifax IDMatrix
- Configure credit rules across every consumer loan type, with responsible lending checks recorded as you go
- Generate and e-sign contracts, with the audit trail attached

Min-IT Pay

Payment services

Direct debit, NPP, PayTo and PayID under one integration, feeding straight into the loan ledger.

- Collect by APCA-compliant direct debit
- Fund and invoice same-day over NPP, through Zepto
- Manage PayTo mandates across the full lifecycle
- Address inbound and outbound payments by PayID

Min-IT LMS

Loan management & servicing

Carries every loan from funding to the final payout: ledger, reconciliation, arrears staging, hardship assessment, security registration, investor reporting and borrower portal.

- Run a live ledger across every consumer loan product, coded and non-coded
- Reconcile automatically without manual intervention
- Work arrears, hardship and complaints on NCCP-aligned workflows
- Pull 60+ built-in reports, including securitisation and investor reporting

Member Portal

Borrower self-service, account management & document access

Your borrowers answer their own questions, on any device, from the same live data your team sees.

- Check current balance, loan position, interest and fees at a glance
- Manage repayment schedule, extra payments, contact details, direct messaging to your team
- Download statements, contracts and correspondence on-demand
- Receive real-time push notifications

Compliant lending software for Australian non-bank lenders. Run origination, servicing and payments in one system with NCCP built in. See it in a quick demo.

Keywords:

compliant lending software, small lenders, credit representatives, growing lenders, established lenders, CRM, LMS, payment, member portal

Solutions

MetaDescription:

Lending software for non-bank lenders - SACC, MACC, consumer, vehicle, asset and commercial loans in one compliant platform. Explore your model.

Keywords:

lending solutions, SACC, MACC, consumer lending, vehicle finance, commercial lending, Min-IT

Partners

MetaDescription:

Lending platform integrations - credit bureaus, KYC identification, payments and communications, pre-built with open APIs and webhooks. Explore Min-IT's integration stack.

Keywords:

lending integrations, credit bureau, open banking, payments, KYC, Min-IT partners

Pricing

MetaDescription:

Loan management software pricing, made simple. A flat platform fee plus usage that moves with your book. No setup costs, no compliance add-ons. Get a quote.

Keywords:

lending software pricing, platform fee, pay as you go, Min-IT pricing

Case Study

MetaDescription:

Loan management software case studies from Australian non-bank lenders about platform migrations, loan origination fixes and system integration. Read the outcomes.

Keywords:

case studies, lending software, LMS, Min-IT case study

About Us

MetaDescription:

Min-IT has built lending software for Australian non-bank lenders since 2006 - origination, servicing and payments, compliance built in. Meet the team.

Keywords:

About Min-IT, Australian lending software, loan management system, compliant lending software

Contact Us

MetaDescription:

Get in touch with the Min-IT team in Brisbane. Call or email for direct access to the development and support team.

Keywords:

contact Min-IT, book a demo, talk to the team, support, customer service, enquiry

Login Page

MetaDescription:

Sign in to your Min-IT member account. Choose your region and open your secure lending workspace.

Keywords:

Min-IT member portal, sign in, log in, region

Demo Page

MetaDescription:

Book a 30-minute live walkthrough of Min-IT. From application to final repayment, mapped to how your lending book runs.

Keywords:

Min-IT Demo, LMS Demo, loan origination system demo, book a demo

FAQs

Solutions FAQ

1. Can we run more than one lending model on the same platform?

Yes. Lenders commonly run SACC and MACC alongside consumer or asset finance in one system, each with its own product rules, documents, fees and workflows. Origination, servicing, payments and reporting stay in one place, so your team isn't moving between systems as your product range grows.

2. How does Min-IT handle NCCP and responsible lending obligations?

Compliance is built into the workflow. Protected Earnings Amount assessment is enforced at approval for SACC lending, serviceability and affordability checks run as part of the application, hardship assessment and default handling follow NCCP-compliant workflows.

Every decision is recorded in an audit trail, and 60+ NCCP and ASIC-aligned reports are exportable on demand, including investor reports.

3. How do you handle KYC, PEP and AUSTRAC screening?

Identity verification and screening run inside origination through GBG GreenID and Equifax ID Matrix, covering PEP and sanctions checks aligned to AML/CTF obligations. Credit and affordability data comes from Equifax, TaleFin and CreditSense, including open-banking serviceability. Results attach to the application, so the evidence is on file if you're ever asked for it.

4. Which payment rails does Min-IT support?

Direct debit and credit across BECS and the NPP through Zepto, and card payments through GlobalPay. Instalment scheduling, dishonour handling, disbursements - including splits to multiple payees for asset finance - reconciliation and payout tracking are managed in the Payment Portal.

Pricing FAQ

1. How does Min-IT pricing work?

There are two parts to it. A flat monthly platform access fee covers the entire platform (Min-IT CRM, Min-IT LMS, Min-IT Pay and the Member Portal), and a usage fee is charged per contract, so your cost moves with your book. There's no separate line item for compliance workflows, because they're part of the platform rather than an add-on.

2. Do we pay per module, or for the whole platform?

The whole platform. Origination, servicing, payments and the borrower Member Portal are included in the one platform access fee. You're not quoted a base system and then charged again for the parts that make it usable, and you don't need to decide up front which modules you'll grow into.

3. What counts as "usage"?

Usage is charged per contract, so it tracks the loans you actually write and service. Quiet months cost less than busy ones. This is the part of the model that stops a smaller lender paying for enterprise scale they haven't reached, and it means your costs rise in step with your book rather than ahead of it.

4. Are the integrations included?

Yes. Equifax, TaleFin, CreditSense, GBG greenID, Equifax IDMatrix, Zepto (NPP and BECS) and GlobalPay are part of the platform, and we don't charge a build fee to switch one on. What each provider charges you for their own data, verification or transaction services sits under your commercial agreement with them.

Products FAQ

1. Where is our data hosted?

Our data is hosted in Australia. Min-IT runs on Microsoft Azure in the Australian region, with separate sandbox and production environments, so borrower and credit data stays onshore. Handling of that data follows the Privacy Act 1988, the Australian Privacy Principles and the Credit Reporting Privacy Code.

2. Do we have to use every module?

Every module is included, so this is a question about rollout rather than licensing. Lenders often start with origination and servicing, bring payments across once that settles, and open the Member Portal when their team is ready for it. Nothing has to be bought again later.

3. Do we get a sandbox environment to test in?

Yes. Every lender gets a sandbox environment alongside production, both hosted in Australia. New products, credit rules, fee structures and contract templates are configured and tested there before they reach a live borrower.

4. Can Min-IT connect to the systems we already run?

Yes. There is an open API and webhooks for broker and aggregator portals, B2C front ends and whatever else sits in your stack. Credit and open banking data comes through TaleFin, CreditSense and Equifax. Identity, PEP and AUSTRAC-aligned screening runs through GBG greenID and Equifax IDMatrix. If something you use is not on that list, tell us what it is and we will tell you whether it is a configuration job or a build.
